## **TRADE AND EMPLOYMENT IN DEVELOPING COUNTRIES**

**Volume 2, *Factor Supply and Substitution***

Edited by **Anne O. Krueger**

The second in a three-volume study, this work extends the analysis of trade regimes and employment through both in-depth studies of single countries and cross-country comparisons. It provides important new evidence of the effects of different trade policies and the various factors that make up these policies. All six studies reflect a coordinated research strategy, combining technical expertise and specialized knowledge of individual countries.

Cloth \$29.00 282 pages

**Volume 1, Individual Studies:** Cloth \$39.00 558 pages
